## Structure of the Website

### Index.html

Containing the main elements of our website from booking to manage it to handling all flights from one location to another with simple data picker methodology.

### Sign.html

Containing the sign-in & sign-up forms for handling login and new members to our community.

### Discover.html

Containing a lot of landmarks across the world to be visited for travelers who would to explore a new places.

### About.html

Holding our information & our vision that we built the website design over it

### Bootstrap 4

Using bootstrap 4 elements to construct the whole design to be fully responsive and support multiple views of the design.

### Node modules

Used for a minor purpose which is passing a parameters from one page to another

=> from discover.html booking buttons to index.html desired destination input field

### jQuery

Used for allowing taps inside a page to be responsive and change with users clicks.

### Fontawesome

Used for simple design flavors.  
A pre-designed icons using ascii-code and could be easily manipulated with CSS.

### CSS

We used css to uniform the whole design as a block unit.

### Compatibility

The design is compatible with the following screen ratio

16:9

18:9

21:9

4:3

And the following Web Browser

Google chrome

Firefox

Safari : although the date picker is not working on safari otherwise it working as expected.

### Logo
